SMA to Alligator Clip Cable

SKU:
250-086

Product Description

An SMA to Alligator Clip Cable for a clean signal connection.

Do you find yourself wishing that your signals were crisp, clean, and unimpeded unlike what you receive out of breadboard wires? Or perhaps do you find yourself called to a higher electrical standard? If you find yourself in either of those categories, or simply see that this cable has the connector that attaches to your component, then look no further. With the SMA connector on one end and a pair of alligator clips on the other, this cable is ideal for high performance impedance analysis and high resolution A/D or D/A conversion measurements.

Features:
- Length: approximately 2ft. (60.96 cm)
- SMA connector with pair of alligator clips
