

# 100 Mbps Compact Media Converter

McBasic TX/FX

## PRODUCT FEATURES

- Has a small, rugged design offering many advanced features
- Available for multi-mode or single-mode fiber
- LinkLoss and FiberAlert features, along with LEDs, assist in diagnosing
- Convert 100 Mbps twisted pair to 100 Mbps fiber

The McBasic's small, table-top design and durability make it perfect for installation anywhere space is limited. Additionally, the McBasic comes with an internal AC power supply. This feature significantly increases reliability over products that use bulky, external AC/DC power transformers. The McBasic series includes:

The McBasic includes troubleshooting features such as LinkLoss, FiberAlert, Transparency and Link Fault Detection that make isolating fiber breaks easier should they occur. The McBasic also features AutoCross on twisted pair connections and diagnostic LEDs. Most McBasic units are available with single-strand fiber which can effectively double the capacity of fiber by allowing two individual channels to share one strand of fiber; Full-Duplex data travels on different wavelengths — 1310 nm and 1550 nm, for example.
